

Bencal Management Corp. — Share Capital Proforma V2

DRAFT · 2026-06-11 · V2
All amounts CAD · IFRS 10.27 investment entity (FVTPL) · 1,000,000 shares authorised and planned
Forward-looking projections; planned/intended values per BCSC continuous-disclosure posture

Purpose

This share capital proforma is prepared to determine the fair market value of strategic partner shareholdings in Bencal Management Corp. The primary purpose is to enable Bencal Management to assess, on a reasoned and documented basis, what portion of strategic partner shareholdings may be offered as bonus shares to initial investors in Bencal SPV1 or Bencal SPVX. All valuations are prepared on an IFRS 10.27 investment-entity basis (fair value through profit or loss) consistent with Bencal Management's accounting treatment of its investment portfolio. Strategic Partner shares that are not allocated or distributed will be retained by Keil Capital and Elzen Holdings. The secondary purpose of this proforma is to model a share capital structure sufficient to comply with TSX Venture Exchange listing requirements, drawing on the current and planned assets of Bencal SPV1, Bencal SPV2, and the revenue arising under the WCP Allocation and Sales Agreement. Where the current structure falls short of exchange requirements on revenue or asset thresholds, this document identifies the gap and proposes structural measures — including potential adjustment to the authorized share count — to meet those requirements at the earliest practicable date. Compliance projections are forward-looking and carry standard BCSC NI 51-102 cautionary language.

Share Capital Structure

Pre-Sale — Keil Capital and Elzen Holdings hold float shares

	Shareholder	Shares	%	Consideration
1				
2	Keil Capital Inc.	375,000	37.5%	\$37.50 (105,000 float shares included)
3	Elzen Holdings Inc.	375,000	37.5%	\$37.50 (105,000 float shares included)
4	Strategic partners	180,000	18.0%	\$18.00 nominal
5	Directors, officers & other	70,000	7.0%	\$7.00 nominal
6	Total	1,000,000	100%	\$100.00

All founding shares issued at \$0.0001 per share (nominal consideration). Total paid-in share capital: \$100.00. The public float price is not nominal — it is determined by market capitalisation of Bencal Management Corp. at the time of sale and is independent of the founding consideration.

Post-Sale — 210,000 float shares distributed to public investors

7	Shareholder	Shares	%	Consideration
8	Keil Capital Inc.	270,000	27.0%	Residual after float sale (105K sold at market)
9	Elzen Holdings Inc.	270,000	27.0%	Residual after float sale (105K sold at market)
10	Float (public investors)	210,000	21.0%	Market price (NAV/share at date of sale)
11	Strategic partners	180,000	18.0%	\$18.00 nominal; unchanged
12	Directors, officers & other	70,000	7.0%	\$7.00 nominal; unchanged
13	Total	1,000,000	100%	—

Strategic partner allocation at nominal consideration, consistent with manager-tier precedent. Float shares originally held by Keil Capital Inc. and Elzen Holdings Inc.; sold via secondary market (proceeds to sellers, not to Bencal). Shares outstanding: 1,000,000 planned.

Market Capitalisation — NAV Roll-Forward (Y0–Y10)

14	Metric	Y0	Y1	Y2	Y3	Y4	Y5	Y6	Y7	Y8	Y9	Y10
15	MARKET CAPITALISATION = NAV (FVTPL ENTITY; IFRS 10.27)											
16	Portfolio NAV — aggregate (= market cap)	\$410K	\$3.05M	\$3.06M	\$3.06M	\$5.72M	\$6.42M	\$8.88M	\$9.82M	\$14.71M	\$16.70M	\$13.59M
17	NAV per share (+ 1,000,000)	\$0.41	\$3.05	\$3.06	\$3.06	\$5.72	\$6.42	\$8.88	\$9.82	\$14.71	\$16.70	\$13.59
18	Year-over-year change (%)	—	+643.6%	+0.4%	+0.1%	+87.0%	+12.1%	+38.5%	+10.5%	+49.8%	+13.5%	–18.6%
19	Float value (210,000 shares)	\$86.0K	\$640K	\$642K	\$643K	\$1.20M	\$1.35M	\$1.87M	\$2.06M	\$3.09M	\$3.51M	\$2.85M
20	Strategic partner value (180,000 shares)	\$73.7K	\$548K	\$550K	\$551K	\$1.03M	\$1.15M	\$1.60M	\$1.77M	\$2.65M	\$3.01M	\$2.45M

Market cap = NAV for an IFRS 10.27 FVTPL investment entity; IFRS book equity per share collapses to NAV per share. Y10 contraction reflects planned portfolio distributions of approximately \$4.3M paid out to investors in that year; total return including distributions is higher. Holding-company discount (10–30% range for illiquid Level-3 interests) is not applied to this base case; see Valuation section below.

Income Statement — 10-Year Summary (Light Office)

Bencal Management Corp. is an IFRS 10.27 FVTPL investment entity. Income for the period comprises fair value remeasurement gains on underlying SPV holdings plus any cash fee income, less G&A. Dividends represent free cash flow paid to shareholders when net income is positive. G&A fixed at \$45,000/year (light-office cost analysis: accounting/legal ~\$20K, D&O insurance ~\$8.5K, compliance/filing ~\$7.5K, minimal admin ~\$9K). Y3 small net loss (\$42K) is funded from the initial opex reserve established at incorporation; no cash shortfall results.

21	Metric	Y0	Y1	Y2	Y3	Y4	Y5	Y6	Y7	Y8	Y9	Y10
22	REVENUE											
23	WCP Allocation & Sales Agreement — placement fees (6% × \$3.0M)	—	\$90,000	\$90,000	—	—	—	—	—	—	—	—
24	Portfolio FVTPL income (fair value remeasurement)	—	\$1,910,000	\$12,000	\$3,000	\$2,620,000	\$536,000	\$1,850,000	\$754,000	\$4,000,000	\$1,880,000	\$4,300,000
25	Total revenue	—	\$2,000,000	\$102,000	\$3,000	\$2,620,000	\$536,000	\$1,850,000	\$754,000	\$4,000,000	\$1,880,000	\$4,300,000
26	EXPENSES											
27	G&A — light office (fixed)	—	(\$45,000)	(\$45,000)	(\$45,000)	(\$45,000)	(\$45,000)	(\$45,000)	(\$45,000)	(\$45,000)	(\$45,000)	(\$45,000)
28	NET INCOME & DISTRIBUTIONS											
29	Net income / (loss)	—	\$1,955,000	\$57,000	(\$42,000)	\$2,575,000	\$491,000	\$1,805,000	\$709,000	\$3,955,000	\$1,835,000	\$4,255,000
30	Memo: opex reserve funding Y3 loss	—	—	—	\$42,000	—	—	—	—	—	—	—
31	EPS (+ 1,000,000 shares)	—	\$1.96	\$0.06	(\$0.04)	\$2.58	\$0.49	\$1.81	\$0.71	\$3.96	\$1.84	\$4.26
32	Free cash flow → dividend	—	\$1,955,000	\$57,000	—	\$2,575,000	\$491,000	\$1,805,000	\$709,000	\$3,955,000	\$1,835,000	\$4,255,000
33	Dividend per share	—	\$1.955	\$0.057	—	\$2.575	\$0.491	\$1.805	\$0.709	\$3.955	\$1.835	\$4.255

Portfolio FVTPL income = fair value remeasurement gain on Bencal SPV1 and SPV2 holdings per period, consistent with IFRS 10.27 investment-entity accounting. Y2–Y3 portfolio income is near-zero (flat NAV growth period); Y3 small net loss (\$42K) is funded from the initial opex reserve; dividends are not paid in Y3. WCP Allocation & Sales Agreement fees are placement fees for services under a separate agreement (not investment income). G&A does not scale with revenue — this entity's overhead is fixed compliance cost driven by its regulated structure, not portfolio throughput.

Valuation — Four Methods and Indicated Fair Value

Mirrors WCP V2 valuation structure. Primary method: book value / NAV per share. Earnings yield method is included for comparability only — it is N/M in loss years and mechanically high in FVTPL remeasurement years; do not use as primary basis. P/E valuation (× 10.72) consistent with WCP V2 §1022. Indicated FMV = simple average across all applicable methods.

34	Valuation method	Y0	Y1	Y2	Y3	Y4	Y5	Y6	Y7	Y8	Y9	Y10
35	VALUATION — FOUR METHODS (PER SHARE, 1,000,000-SHARE BASIS)											
36	Book value / NAV per share (primary)	\$0.41	\$3.05	\$3.06	\$3.06	\$5.72	\$6.42	\$8.88	\$9.82	\$14.71	\$16.70	\$13.59
37	Earnings yield per share (portfolio FVTPL income + 4.5% cap rate)	N/M	\$42.49	N/M	N/M	\$58.22	\$11.91	\$41.11	\$16.76	\$88.89	\$41.78	\$95.56
38	P/E earnings valuation (× 10.72)	N/M	\$20.50	N/M	N/M	\$28.09	\$5.74	\$19.83	\$8.08	\$42.88	\$20.15	\$46.10
39	NAV at –20% holding-company discount	\$0.33	\$2.44	\$2.45	\$2.45	\$4.58	\$5.14	\$7.10	\$7.86	\$11.77	\$13.36	\$10.87
40	Indicated FMV / share (avg excl. N/M years)	\$0.37	\$17.12	\$2.76	\$2.76	\$24.15	\$7.30	\$19.23	\$10.63	\$39.56	\$23.00	\$41.53
41	Indicated FMV is the simple unweighted average of all applicable method values for each year. Methods 2 (Earnings yield) and 3 (P/E valuation) are excluded where marked N/M — years with insufficient or negative net income. Methods 1 (Book value / NAV per share) and 4 (Earnings yield method) are included where marked N/M — years with insufficient or negative net income.											

Earnings yield: portfolio FVTPL income per share (remeasurement basis, pre-G&A) capitalised at 4.5% — consistent with investment-entity earnings-yield convention. P/E: FVTPL income per share × 10.72 (consistent with WCP V2 §1022). N/M = not meaningful (loss year or negligible income). Holding-company discount: 10–30% typical range for illiquid Level-3 minority interests; –20% used as base case. Indicated FMV = simple average of applicable methods (NAV, earnings yield, P/E, NAV-at-discount) per year.

TSX Venture Exchange — Tier 2 Listing Qualification

Bencal Management Corp. is classified as an Investment Issuer under TSXV Policy 2.1, subject to the Investment Issuer NTA minimum of \$2,000,000 (vs. \$750,000 for Industrial issuers). The following table assesses current and projected compliance. Forward-looking projections carry BCSC NI 51-102 cautionary language.

42	Requirement	TSXV Tier 2 Minimum	Bencal Y0	Bencal Y4	Status
43	Net Tangible Assets (Investment Issuer)	\$2,000,000	\$410,000	\$5,720,000	Short at Y0 by \$1,590,000; meets at Y4
44	Public float — share count (free-trading)	500,000 shares	210,000 planned	210,000 (structural)	Short by 290,000 shares — see note below
45	Public float — ownership %	≥ 20% of issued/outstanding	21.0% planned	21.0% planned	Meets % requirement
46	Public shareholders (board lots)	200 holders, no resale restrictions	TBD	TBD	Must be demonstrated at listing date
47	Minimum listing price	\$0.10 / share	\$0.41 NAV/share	\$5.72 NAV/share	NAV meets; founding issue price (\$0.0001) requires capital restructuring before listing
48	Investment policy disclosure	≥ 50% allocated to ≥ 2 investments	Bencal SPV1 + SPV2	Same	Meets structural test
49	Revenue / expenditure threshold	None (Investment Issuer category)	N/A	N/A	Not applicable

Float Share Shortfall Analysis

50	Item	Current Plan	TSXV Minimum	Gap
51	Total shares outstanding	1,000,000	—	—
52	Float shares (public, free-trading)	210,000	500,000	–290,000 short
53	Float %	21.0%	≥ 20%	Meets %

Resolution options: (1) Keil Capital and Elzen Holdings each sell 250,000 shares (vs. 105,000 current plan) — total float = 500,000; each retains 125,000 shares. (2) Bencal issues 500,000 new shares to the public (increasing total shares to 1,500,000; Y1 EPS falls to \$1.30/share — still above \$1.00). Both options satisfy the 500,000 free-trading minimum.

EPS impact of increased share count: Y1 net income is approximately \$1,955,000. At 1,000,000 shares, Y1 EPS = \$1.96/share. At 1,500,000 shares, Y1 EPS = \$1.30/share (still ≥ \$1.00). Maximum share count before Y1 EPS falls below \$1.00: approximately 1,955,000 shares. The EPS constraint is non-binding for any float-driven share increase up to ~1.95 million total shares. Note: a Y1 EPS floor of \$1.00/share is an internal structuring target, not a TSXV listing requirement.

Capital structure note: All founding shares were issued at \$0.0001/share, below the TSXV \$0.05 pre-listing review floor and \$0.10 minimum listing price. A share consolidation or capital restructuring is required before listing. Strategic Partner shares not yet allocated will be retained by Keil Capital and Elzen Holdings.

Earliest projected listing year: Y4 (NAV \$5.72M, well above \$2M NTA threshold), subject to resolution of float and capital restructuring requirements.

Float Sale Scenarios

Two delivery mechanisms for the 21% float (210,000 shares). Scenario A: secondary market sale — Keil Capital Inc. and Elzen Holdings Inc. sell existing shares; proceeds flow to sellers; Bencal Management Corp. financial statements are unaffected. Scenario B: Keil Capital Inc. and Elzen Holdings Inc. each transfer 105,000 shares to Bencal treasury; Bencal resells those treasury shares to public investors at market price; proceeds flow to Bencal Management Corp.

Scenario A — Secondary Market Sale (Existing Shares; Proceeds to Keil and Elzen)

A1 — Single IPO: all 210,000 float shares sold at once

54	IPO timing	NAV / share	P/E value / share (× 10.72)	Float raise (210K shares)	Seller MOIC	Seller CAGR	Strategic value at date
55	Y0 (immediately)	\$0.41	N/M	\$86,100	1.0×	0.0%	\$73,710
56	Y4	\$5.72	\$28.09	\$1,201,200	13.95×	93.3%	\$1,029,885
57	Y8 (portfolio peak)	\$14.71	\$42.88	\$3,089,100	35.9×	56.5%	\$2,648,307
58	Y10	\$13.59	\$46.10	\$2,853,900	33.2×	41.9%	\$2,446,442

P/E value / share reflects the capitalised earnings power of the entity at the point of sale; N/M at Y0 as no material net income is recorded in Y0. NAV/share and P/E value provide orthogonal views: NAV measures asset liquidation value; P/E measures income-generating capacity. Both are relevant to TSX Venture Exchange investors.

Seller MOIC and CAGR computed from Y0 cost basis (\$0.41/share = Y0 NAV; 210,000-share float cost = \$86,100). Proceeds flow to Keil Capital Inc. (~\$1.43M) and Elzen Holdings Inc. (~\$1.43M) at Y10 IPO. Bencal Management Corp. receives \$0.

A2 — Gradual sale: 21,000 shares per year, priced at prior year-end NAV

59	Year of tranche	Shares sold	Price (prior-yr NAV)	Tranche proceeds	Cumulative proceeds
60	Y1 (priced at Y0 NAV \$0.41)	21,000	\$0.41	\$8,610	\$8,610
61	Y2 (priced at Y1 NAV \$3.05)	21,000	\$3.05	\$64,050	\$72,660
62	Y3 (priced at Y2 NAV \$3.06)	21,000	\$3.06	\$64,260	\$136,920
63	Y4 (priced at Y3 NAV \$3.06)	21,000	\$3.06	\$64,260	\$201,180
64	Y5 (priced at Y4 NAV \$5.72)	21,000	\$5.72	\$120,120	\$321,300
65	Y6 (priced at Y5 NAV \$6.42)	21,000	\$6.42	\$134,820	\$456,120
66	Y7 (priced at Y6 NAV \$8.88)	21,000	\$8.88	\$186,480	\$642,600
67	Y8 (priced at Y7 NAV \$9.82)	21,000	\$9.82	\$206,220	\$848,820
68	Y9 (priced at Y8 NAV \$14.71)	21,000	\$14.71	\$308,910	\$1,157,730
69	Y10 (priced at Y9 NAV \$16.70)	21,000	\$16.70	\$350,700	\$1,508,430
70	10-year total (A2)	210,000	—	—	\$1,508,430

A2 total proceeds of \$1,508,430 vs. A1 Y10 single IPO of \$2,853,900 — the lump-sum IPO at Y10 generates approximately 89% more in total proceeds. Gradual sale provides price discovery and staged liquidity rather than proceeds maximisation. Both are secondary-market transactions; Bencal financial statements are unaffected in either case.

Scenario B — Primary Capital Raise (Same 210,000 Float Shares; Proceeds to Bencal)

In Scenario B, Keil Capital Inc. and Elzen Holdings Inc. each transfer 105,000 shares to Bencal Management Corp. as treasury contributions. Bencal then sells these same 210,000 treasury shares to public investors at market price, receiving the proceeds into Bencal treasury for SPV reinvestment. Total shares outstanding remains 1,000,000 in both scenarios — the same 210,000 float shares are offered to the market in each case. The structural difference: in Scenario A, proceeds flow to Keil Capital and Elzen Holdings; in Scenario B, proceeds flow to Bencal Management Corp.

Primary Issuance — Treasury Share Resale at NAV (No Dilution; Proceeds to Bencal)

71	Metric	Y4 resale	Y10 resale
72	Treasury shares sold (from Keil + Elzen contribution)	210,000	210,000
73	Sale price (= NAV/share)	\$5.72	\$13.59
74	Gross proceeds to Bencal treasury	\$1,201,200	\$2,853,900
75	Total shares outstanding (pre- and post-sale)	1,000,000	1,000,000
76	Pre-sale portfolio NAV	\$5,720,000	\$13,590,000
77	Post-sale aggregate NAV (portfolio + proceeds)	\$6,921,200	\$16,443,900
78	Post-sale NAV / share (+ 1,000,000)	\$6.92	\$16.44
79	NAV / share accretion (vs. pre-sale)	+\$1.20	+\$2.85

At-NAV treasury share resale: Bencal receives proceeds equal to NAV/share × 210,000 shares. These proceeds increase Bencal's total asset base, resulting in NAV/share accretion for all remaining shareholders. Unlike new share issuance (which would increase share count), treasury share resale keeps shares outstanding at 1,000,000.

Below-NAV Treasury Resale — Impact Analysis (Illustrative; Y10)

80	Metric	At NAV (\$13.59)	At –20% discount (\$10.87)	Difference
81	Sale price / share	\$13.59	\$10.87	–\$2.72
82	Gross proceeds to Bencal	\$2,853,900	\$2,282,700	–\$571,200
83	Post-sale aggregate NAV	\$16,443,900	\$15,872,700	–\$571,200
84	Post-sale NAV / share	\$16.44	\$15.87	–\$0.57
85	NAV/share vs. at-NAV scenario	—	–\$0.57 (–3.5%)	—
86	Strategic partner value (180K shares)	×\$16.44 = \$2,959,200	×\$15.87 = \$2,856,600	–\$102,600

Below-NAV treasury resale reduces proceeds to Bencal treasury, resulting in lower post-sale NAV/share for all remaining holders. The –20% scenario is illustrative; any resale decision is subject to board approval. Both Scenario B outcomes (at-NAV and below-NAV) result in higher post-sale NAV/share than the pre-sale \$13.59, because Bencal is receiving new capital rather than distributing existing value.

Deployment of Proceeds — Incremental Return on Scenario B Y10 Proceeds of \$2,854K

87	Deployment scenario	Base deployed	Annual rate	5-yr FV	10-yr FV	5-yr MOIC	10-yr MOIC	Basis / notes
88	A — Proportional IRR (engine portfolio CAGR Y1–Y10)	\$2,854K	18.08%	\$6,556K	\$15,058K	2.30×	5.28×	Engine-computed Y1–Y10 portfolio CAGR; Bencal invests proceeds proportionally across ex
89	B — Conservative floor (private RE hurdle rate)	\$2,854K	8.00%	\$4,195K	\$6,161K	1.47×	2.16×	Conservative private real estate IRR floor; stress-test scenario
90	C — Hypothetical SPV3 target (illustrative)	\$2,854K	15.00%	\$5,741K	\$11,551K	2.01×	4.05×	Illustrative only; no SPV3 transaction is planned. Based on planned target return for a h

FV = gross future value of \$2,854K proceeds, excluding issuance costs (IAS 32.37). MOIC = (1 + annual rate)^n. Deployment returns are incremental to existing Bencal SPV1 and SPV2 returns shown in this proforma. All amounts planned/intended; actual results may differ.

Secondary vs. Primary — Side-by-Side Comparison (Y10)

91	Dimension	Scenario A — Secondary market	Scenario B — Treasury share resale (at NAV)
92	STRUCTURAL MECHANICS		
93	Proceeds recipient	Keil Capital Inc. + Elzen Holdings Inc. (~\$1.43M each)	Bencal Management Corp. (
94	Cash received by Bencal	\$0	
95	Shares outstanding after	1,000,000 (unchanged)	1,000,000 (unchanged — treasur
96	NAV / share after	\$13.59 (unchanged)	\$16.44 (accreti
97	Impact on Bencal FVTPL proforma	None — Bencal financial statements unaffected	NAV/share increases to \$16.44; \$2,854K available for addition
98	RETURN TO ORIGINAL SHAREHOLDERS		
99	Keil + Elzen combined gain (vs. Y0 cost \$86K)	\$2,767,800 combined (32.2× MOIC)	\$0 — shares contributed to Bencal treasury (founders retain 270K shares each at \$16.44/share = \$4,438,800 each — NAV gain on
100	Keil + Elzen residual equity value	\$3,669,300 each at \$13.59	\$4,438,8
101	Best scenario for sellers (Keil/Elzen)	Scenario A — realises capital gain	Scenario A — Keil/Elzen re
102	Best scenario for Bencal growth	Scenario A leaves Bencal capitalisation unchanged	Scenario B — Bencal deploys \$2.85M into

The two scenarios are not mutually exclusive. Keil and Elzen may execute a secondary sale (Scenario A) while Bencal separately arranges a treasury resale of contributed shares (Scenario B) if authorised and structured appropriately. Each scenario requires independent approvals and documentation.

Appendix — Bencal SPVX: Direct-Hold Solution Co-Investment Scenario

Under this illustrative scenario, Bencal Management Corp. co-invests alongside Woodfine Capital Projects Inc. by holding a 10% beneficial LP interest in each Direct-Hold Solution — parallel to WCP's own 10% beneficial ownership. Each DHS investment is held in an individual Bencal SPVX entity, for the benefit of Bencal investors. This appendix is illustrative only; individual Bencal SPVX entities have not been incorporated, and actual contributions are subject to WCP investment committee approval and DHS deployment timelines. Capital contribution amounts are substantial relative to Bencal Management's current capitalized base and would require independent SPVX fundraising by each SPVX vehicle.

Bencal SPVX Positions — NAV at WCP-Equivalent 10% Interest

103	DHS	Vehicle	Bencal SPVX	Deployment Year	Bencal 10% NAV at Deployment	Y5 NAV	Y10 NAV
104	DHS-01	Professional Centres Canada LP	Bencal SPVX-1	Y1	\$29,290,000	\$38,710,000	\$108,800,000

DHS Waterfall — Advisory Fees and Distributions (per WCP V2)

111	DHS	Deployment Year	Advisory fees at maturity	Distributions to 10% holder (Y10)
112	DHS-01 Professional Centres Canada LP	Y1	\$2,500,000/year	\$6,740,000
113	DHS-02 Professional Centres US LP	Y2	\$6,690,000/year	\$17,930,000
114	DHS-03 Professional Centres Spain SOCIMI	Y2	\$3,660,000/year	\$9,830,000
115	DHS-04 Professional Centres Mexico FIBRA	Y3	\$3,340,000/year	\$8,920,000
116	DHS-05 Vertical Warehouse US LP	Y4	\$3,340,000/year	\$1,630,000
117	DHS-06 Parking Structure US LP	Y5	\$3,340,000/year	\$1,240,000
118	Total (Y10)	—	\$22,870,000/year	\$46,290,000

Advisory fee and distribution data sourced from COMPLIANCE_MCorp_2026_06_04_Proforma_WCP_V2.html. Each Bencal SPVX would receive distributions proportional to its 10% LP interest — the same distributions shown above for WCP's 10% beneficial ownership. At full deployment (Y10), aggregate Bencal SPVX holdings represent a theoretical portfolio NAV of \$865.36M and annual distributions of \$46.29M — material long-term value creation for Bencal investors.

Forward-Looking Information — BCSC NI 51-102. This document contains forward-looking information, including planned net asset values, projected distributions, fair market value estimates, and share-capital scenarios. These projections are based on the FVTPL proforma prepared under IFRS 10.27 using planned/intended portfolio returns. Actual results may differ materially.

Valuation basis. NAV per share is the primary valuation method, applied consistently with IFRS 10.27 investment entity accounting (all holdings carried at fair value through profit or loss). Earnings yield, P/E capitalisation, and holding-company-discount methods are included for comparative purposes only; none is a primary basis of value. FVTPL remeasurement gains are recognised in the income statement and create mechanically high earnings-yield readings in favourable years — read alongside the NAV primary method.

Related-party disclosure (IAS 24). Keil Capital Inc. and Elzen Holdings Inc. are related parties of Bencal Management Corp. Strategic partner share allocations described herein are at nominal consideration, consistent with manager-tier precedent. All terms are subject to final agreement between the parties.

Primary issuance. If Bencal Management Corp. were to issue new shares in a primary market transaction, the proceeds indicated are gross amounts. Issuance costs would be deducted directly from equity under IAS 32.37 and are not reflected in the incremental return scenarios above.

Below-NAV treasury resale. The below-NAV treasury share resale analysis in Scenario B is illustrative only and does not constitute a recommendation to sell shares at any particular price or discount. Any such decision is subject to board approval and applicable securities law.

SPV3 hypothetical. The Scenario B — Method C incremental return projection refers to a hypothetical SPV3 vehicle. No SPV3 transaction is planned or intended. This projection is illustrative only and does not constitute an offer to sell or a solicitation to buy any security.

No solicitation. Nothing in this document constitutes an offer to sell or a solicitation to buy any security. This document is prepared for internal compliance review purposes only. DRAFT — 2026-06-11 — V2.
