

Woodfine Direct-Hold Solutions — Building Portfolio Proforma V2

Four-DHS extrapolation (Canada · United States · Spain · Mexico) with Development-Sites layer, worked backwards from the fixed Woodfine building prototypes. Supersedes COMPLIANCE_MCorp_2026_06_04_Proforma_BuildingPortfolio_V1.html (single Canada / PCLP 1 portfolio).

DRAFT — 2026-06-13 — V2

All amounts CAD — Development yield 10.5% · cap rate 6.25% · NOI 57% of rent — Forward-looking projections; planned / intended values per BCSC continuous-disclosure posture.

1 · Development Class Financial Statements

Foundation of the portfolio. Each of the four Development Classes is calibrated so its construction cost earns a 10.5% development yield; everything below scales from these per-building economics. Legal floor geometry: Professional Centres 3–5 floors (21,000 sf/floor); Suburban Office 6–9 floors (19,000 sf/floor); Retail Select and Tech Industrial single-storey. Tech Industrial is always built in pairs.

Professional Centres — \$310/sf GLA

1	Variant	GLA	Construction cost	Rent (10.5%)	NOI (57%)	Asset value (6.25%)	Depreciation (40yr)	Dev yield
2	3-floor	63,000 sf	\$19.5M	\$2.1M/yr	\$1.2M/yr	\$18.7M	\$0.5M/yr	10.5%
3	4-floor	84,000 sf	\$26.0M	\$2.7M/yr	\$1.6M/yr	\$24.9M	\$0.7M/yr	10.5%
4	5-floor (reference)	105,000 sf	\$32.5M	\$3.4M/yr	\$1.9M/yr	\$31.2M	\$0.8M/yr	10.5%

Suburban Office — \$310/sf GLA

5	Variant	GLA	Construction cost	Rent (10.5%)	NOI (57%)	Asset value (6.25%)	Depreciation (40yr)	Dev yield
6	6-floor	114,000 sf	\$35.3M	\$3.7M/yr	\$2.1M/yr	\$33.8M	\$0.9M/yr	10.5%
7	7-floor	133,000 sf	\$41.2M	\$4.3M/yr	\$2.5M/yr	\$39.5M	\$1.0M/yr	10.5%
8	8-floor (reference)	152,000 sf	\$47.1M	\$4.9M/yr	\$2.8M/yr	\$45.1M	\$1.2M/yr	10.5%
9	9-floor	171,000 sf	\$53.0M	\$5.6M/yr	\$3.2M/yr	\$50.8M	\$1.3M/yr	10.5%

Retail Select — \$260/sf GLA

10	Variant	GLA	Construction cost	Rent (10.5%)	NOI (57%)	Asset value (6.25%)	Depreciation (40yr)	Dev yield
11	4,500 sf	4,500 sf	\$1.2M	\$0.1M/yr	\$0.1M/yr	\$1.1M	\$0.0M/yr	10.5%
12	6,700 sf (reference)	6,700 sf	\$1.7M	\$0.2M/yr	\$0.1M/yr	\$1.7M	\$0.0M/yr	10.5%
13	7,700 sf	7,700 sf	\$2.0M	\$0.2M/yr	\$0.1M/yr	\$1.9M	\$0.1M/yr	10.5%

Tech Industrial — \$260/sf GLA

14	Variant	GLA	Construction cost	Rent (10.5%)	NOI (57%)	Asset value (6.25%)	Depreciation (40yr)	Dev yield
15	7,200 sf pair-half	7,200 sf	\$1.9M	\$0.2M/yr	\$0.1M/yr	\$1.8M	\$0.0M/yr	10.5%
16	8,400 sf pair-half (reference)	8,400 sf	\$2.2M	\$0.2M/yr	\$0.1M/yr	\$2.1M	\$0.1M/yr	10.5%

2 • Building Geometry Distribution (per 1× DHS)

A realistic spread of floor counts and plate sizes within the legal bounds — no single maxed-out prototype repeated. The skew toward taller anchors is the lever that keeps the development-site count digestible. Counts are per 1× DHS (Canada / Spain / Mexico each; United States is 2×).

17	Class • Variant	GLA / building	Mix weight	Buildings (per 1× DHS)
18	Professional Centres • 3-floor	63,000 sf	5.0%	1
19	Professional Centres • 4-floor	84,000 sf	25.0%	3
20	Professional Centres • 5-floor (reference)	105,000 sf	70.0%	8
21	Suburban Office • 6-floor	114,000 sf	10.0%	2
22	Suburban Office • 7-floor	133,000 sf	20.0%	3
23	Suburban Office • 8-floor (reference)	152,000 sf	35.0%	5
24	Suburban Office • 9-floor	171,000 sf	35.0%	5
25	Retail Select • 4,500 sf	4,500 sf	15.0%	3
26	Retail Select • 6,700 sf (reference)	6,700 sf	45.0%	10
27	Retail Select • 7,700 sf	7,700 sf	40.0%	9
28	Tech Industrial • 7,200 sf pair-half	7,200 sf	40.0%	14
29	Tech Industrial • 8,400 sf pair-half (reference)	8,400 sf	60.0%	20
30	Total buildings (per 1× DHS)	3,906,855 sf	—	85

3 • Development-Site Composition

The business plan is to build individual Woodfine Buildings; the Woodfine Campus — a larger site in a denser market that accommodates all four classes together — is the exception and is held to a minority (ceiling 30.0%). Sites are worked backwards from the prototypes so the class building counts reconcile exactly to Section 2.

31	Site type	Composition	Structures/site	Share of sites	Sites (per 1× DHS)
32	Woodfine Campus	1 PC + 1 SO + 1 RS pair + 2 TI pairs	8	25.0%	5
33	Anchor + pair	1 PC or SO + 1 pair (RS or TI)	3	75.0% of remainder	12
34	Standalone	1 PC or SO	1	25.0% of remainder	4
35	Total development sites (per 1× DHS)	—	3.9 avg	100%	22

Anchor split 60.0% Suburban Office / 40.0% Professional Centres; pair split 50.0% Retail Select / 50.0% Tech Industrial. ~7.3 sites per country per three-year cycle.

4 • Per-DHS Rollup (full modeled build-out)

Each Direct-Hold Solution replicates the 1× building portfolio scaled by its size factor (United States 2×). Figures are the fully-modeled portfolio; Section 5 shows how much is delivered inside the 10-year window. All amounts CAD.

36	Direct-Hold Solution	Ccy	Size	Launch	Sites	Buildings	GLA	Cost	NOI	Asset value
37	Professional Centres Canada LP	CAD	1×	Y1	22	85	3,906,855 sf	\$1,189.8M	\$71.2M/yr	\$1,139.3M
38	Professional Centres United States LP	USD	2×	Y2	44	169	7,813,710 sf	\$2,379.5M	\$142.4M/yr	\$2,278.7M
39	Professional Centres Spain SOCIMI	EUR	1×	Y2	22	85	3,906,855 sf	\$1,189.8M	\$71.2M/yr	\$1,139.3M
40	Professional Centres Mexico FIBRA	MXN	1×	Y3	22	85	3,906,855 sf	\$1,189.8M	\$71.2M/yr	\$1,139.3M
41	Four-DHS system	CAD	5×	—	109	423	19,534,275 sf	\$5,948.9M	\$356.0M/yr	\$5,696.6M

5 • Build-Out Y1 → Y10 (program window, matches WCP)

Physical delivery is paced over each DHS's own ~10-year build life from its launch year (capital commits faster than concrete pours; delivery trails the WCP capital ramp). Development sites and Woodfine Buildings shown cumulative-delivered; later DHSs do not reach full build-out inside the window (see Section 6). AUM = gross asset value of the delivered portfolio, CAD.

42	Line	Y1	Y2	Y3	Y4	Y5	Y6	Y7	Y8	Y9	Y10
43	DEVELOPMENT SITES — DELIVERED (CUMULATIVE)										
44	Canada	2	4	7	9	11	13	15	17	20	22
45	United States	0	4	9	13	17	22	26	31	35	39
46	Spain	0	2	4	7	9	11	13	15	17	20
47	Mexico	0	0	2	4	7	9	11	13	15	17
48	All-DHS sites delivered	2	11	22	33	44	55	65	76	87	98
49	WOODFINE BUILDINGS — DELIVERED (CUMULATIVE)										
50	Canada	8	17	25	34	42	51	59	68	76	85
51	United States	0	17	34	51	68	85	101	118	135	152
52	Spain	0	8	17	25	34	42	51	59	68	76
53	Mexico	0	0	8	17	25	34	42	51	59	68
54	All-DHS buildings delivered	8	42	85	127	169	211	254	296	338	381
55	ALL-DHS SITES UNDER CONSTRUCTION (IN-YEAR)										
56	Sites added this year	2	9	11	11	11	11	11	11	11	11
57	ASSETS UNDER MANAGEMENT (CAD)										
58	AUM — delivered portfolio	\$0.11B	\$0.57B	\$1.14B	\$1.71B	\$2.28B	\$2.85B	\$3.42B	\$3.99B	\$4.56B	\$5.13B

6 • System Scale & Remaining-Sites Reconciliation

Built within the 10-year window vs the total fully-modeled portfolio. The remaining Development Sites complete after Y10 to reach the full modeled leasable area — wording support for the prospectus and investor materials.

59	Direct-Hold Solution	Total sites	Built by Y10	Remaining	% built
60	Canada	22	22	0	100.0%
61	United States	44	39	4	90.0%
62	Spain	22	20	2	90.0%
63	Mexico	22	17	4	80.0%
64	Four-DHS system	109	98	11	90.0%

65	Metric (four-DHS system)	Built within Y10	Total fully modeled	Remaining post-Y10
66	Development sites	98	109	11
67	Woodfine Buildings	381	423	42
68	Gross leasable area	17,580,848 sf	19,534,275 sf	1,953,428 sf
69	Net operating income (CAD/yr)	\$320.4M/yr	\$356.0M/yr	\$35.6M/yr
70	Assets under management (CAD)	\$5.13B	\$5.70B	\$0.57B

AUM crosses ~CAD 4 billion around Year 8 — consistent with the prospectus target of approximately CAD 4 billion of assets under management over six to eight years.

7 • Simulation — Sensitivity to the Campus Share

Site count is near-invariant to the dials; the campus share (capped at the business-plan ceiling 30.0%) and the geometry skew trade Retail/Tech density against the development-site count. Per 1× DHS at the default pair / anchor splits.

71	Campus share	Sites (1× DHS)	Sites/cycle	Buildings (1× DHS)	System sites	System buildings
72	20.0%	23	7.6	82	114	410
73	25.0%	22	7.3	85	109	423
74	30.0%	21	7.0	87	105	434

8 • Methodology & Assumptions

Per-1×-DHS leasable area is pinned to the WCP / PCLP 1 revenue-generator ramp at 3,906,855 sf (46,196 sf per Development Class building × the geometric mix). The United States DHS is 2× (size factor); Canada, Spain and Mexico are 1×. Launch years (Canada Y1, United States Y2, Spain Y2, Mexico Y3) follow the WCP revenue generator.

Development sites are worked backwards from the fixed building prototypes: total leasable area ÷ average site area = number of sites. Construction cost per Development Class: Professional Centres and Suburban Office at \$310/sf GLA; Retail Select and Tech Industrial at \$260/sf GLA. Development yield = rent ÷ cost = 10.5%; NOI = rent × 57% (43% operating-cost ratio); asset value = NOI ÷ 6.25% cap rate; depreciation = cost ÷ 40 years (building component only). Amounts CAD.

Legal geometry: Professional Centres 3–5 floors (21,000 sf/floor); Suburban Office 6–9 floors (19,000 sf/floor); Retail Select 4,500 / 6,700 / 7,700 sf; Tech Industrial 7,200 / 8,400 sf, always paired. **Time:** program Y1–Y10 absolute (matching the WCP proforma tables); physical delivery paced over each DHS's ~10-year build life from launch.

Forward-Looking Information — Notice under applicable securities legislation including the British Columbia Securities Commission (BCSC) and NI 51-102. This document contains forward-looking information. All building counts, development-site counts, square footage, cost estimates, NOI figures, asset valuations, assets-under-management figures, and yield targets are management estimates based on planning assumptions as of the date of this document and are subject to material change. Development-site composition (Woodfine Campus / anchor-plus-pair / standalone shares) and the geometric distribution of floor counts are planning parameters, not commitments. Actual results may differ materially. This document is prepared for internal planning purposes and does not constitute an offering memorandum, financial advice, or an offer to sell or solicitation to buy any security. Readers should not place undue reliance on forward-looking information.
